

Pitch	Closure	Onset	Nasalization	Vowel
r rising	c closed	z zero	n nasalized	e front mid
f falling	o open	h aspiration	o oral	E British English /æ/ (near-open front unrounded)
l level	i intermediate	g glottal stop		@ schwa (mid central)
		o other		a open central
				o other

Available for all categories

x can't tell (for overlap, low volume, bad audio quality, or other reasons for inaudibility)

Code format x-x-x-x-x, e.g. r-o-z-n-E

Notes format p: comment. c: comment. o: comment. n: comment. v: comment.

Rules of thumb

Pitch relative to the beginning of the form, is the end of the form higher (Rising), lower (Falling) or the same (Level)?

Closure is mouth closed, open, or intermediate?

Onset if you hear any aspiration or glottal stop, code it.

Nasalization if you hear any, code "n" | also if mouth is closed, code "n"

Vowel the four vowel bins are fairly large | use notes field for more precision if needed, e.g. "a bit low", "higher than my choice", etc.
| if mouth is closed, code "x".
